1967 Cadillac DeVille technical and mechanical specifications
Cadillac used color coded ribbed vacuum hoses from the 60s to the late 70s to make it easier to identify them on the vacuum schematics in the shop manual. These vacuum hoses unfortunately get extremely hard and brittle over the decades under the harsh conditions in the engine bay.

Deville Technical problems

Technically the car was a mess too. It needed a new washer and wiper assembly, climate compressor, new hydraulic lifters, all new gaskets, all new hoses, new power steering pump and gear, complete new brake system with reground drums, all new bulbs, new ignition lock, power antenna, some switches, complete exhaust system, shocks ...

The complete restoration of my 1967 Cadillac DeVille with ...

The 1967 model year offered a new valve train and camshaft which contributed to smooth and instant response of the Cadillac engine. Power was derived from the 7.0 litre 429 CID 16-valve OHV V8 engine that used either a Rochester #7028230 or a carter AFB 3903S 4-bbl carburetor.

Diagram of a 1997 Cadillac deville vacuum hoses on engine ...

Cadillac was the first automobile maker in the world to mass-produce V8 engines. [citation needed] The company has produced many generations and variations of V8s since 1914. In 2010, when the Northstar engine series ended production, it became the last General Motors division to retain its own proprietary V8 design. This changed when Cadillac created the twin-turbo 'Blackwing' engine in 2019.
