Over the last decade, fluorescence has become the dominant tool in biotechnology and medical imaging. These exciting advances have been underpinned by the advances in time-resolved techniques and instrumentation, probe design, chemical / biochemical sensing, coupled with our furthered knowledge in biology. Complementary volumes 9 & 10, Advanced Concepts of Fluorescence Sensing: Small Molecule Sensing and Advanced Concepts of Fluorescence Sensing: Macromolecular Sensing, aim to summarize the current state of the art in fluoresent sensing. For this reason, Drs. Geddes and Lakowicz have invited chapters, encompassing a broad range of fluorescence sensing techniques. Some chapters deal with small molecule sensors, such as for anions, cations, and CO2, while others summarize recent advances in protein-based and macromolecular sensors. The Editors have, however, not included DNA or RNA based sensing in this volume, as this were reviewed in Volume 7 and is to be the subject of a more detailed volume in the near future.

"There are places where history feels irrelevant, and America's inner cities are among them," acknowledges Michael Katz, in expressing the tensions between activism and scholarship. But this major historian of urban poverty realizes that the pain in these cities has its origins in the American past. To understand contemporary poverty, he looks particularly at an old attitude: because many nineteenth-century reformers traced extreme poverty to drink, laziness, and other forms of bad behavior, they tried to use public policy and philanthropy to improve the character of poor people, rather than to attack the structural causes of their misery. Showing how this misdiagnosis has afflicted today's welfare and educational systems, Katz draws on his own experiences to introduce each of four topics--the welfare state, the "underclass" debate, urban school reform, and the strategies of survival used by the urban poor. Uniquely informed by his personal involvement, each chapter also illustrates the interpretive power of history by focusing on a strand of social policy in the nineteenth and twentieth centuries: social welfare from the poorhouse era through the New Deal, ideas about urban poverty from the undeserving poor to the "underclass," and the emergence of public education through the radical school reform movement now at work in Chicago. Why have American governments proved unable to redesign a welfare system that will satisfy anyone? Why has public policy proved unable to eradicate poverty and prevent the deterioration of major cities? What strategies have helped poor people survive the poverty endemic to urban history? How did urban schools become unresponsive bureaucracies that fail to educate most of their students? Are there fresh, constructive ways to think about welfare, poverty, and public education? Throughout the book Katz shows how interpretations of the past, grounded in analytic history, can free us of comforting myths and help us to reframe discussions of these great public issues.

When the god Anubis chooses Molly Bartolucci to become a reaper, she accidentally undoes the work of another reaper, Rath, which earns her a trip to the Nekyia Academy where her personal reaping tutor is none other than Rath. Original.

"Former Navy SEAL Ian Dunn has been tasked by a mysterious government agency with rescuing two kidnapped children believed to have been taken prisoner in a South American embassy. Leading the mission alongside Phoebe Kruger, the new hire at the prestigious law firm where Dunn is a longtime client, Dunn will embark on a race against time while simultaneously dealing with an equally pressing danger -- he's being hunted by the mob for a job gone bust. In the midst of all this, Phoebe gets sucked deeper and deeper into Dunn's clandestine world, and Dunn faces some surprises of his own as he slowly becomes aware of Phoebe's sharp intelligence, keen sense of humor and generous heart--things he's been missing all his life"--

This book marks an important watershed in the development of psychotherapy. It provides examples of how psychotherapeutic research and the abilities to carry it out can help the practising psychotherapist. A lack of relative knowledge of research in psychotherapy, a history of apparent defensiveness is being evaluated, and a reluctance to work with universities has developed in psychotherapy. The papers represent a cross-section of current research thinking from within the UKCP, North America and Continental Europe. It will prove useful for students and practitioners of psychotherapy, as well as those more traditionally

engaged in psychotherapeutic research. The book has been divided into five sections: Section One outlines what is meant by psychotherapeutic research and gives an overview of the features of different research methods. Section Two describes how to get started in the use of qualitative and quantitative methods. Section Three focuses on research into the process of psychotherapy.

Orb had a rare gift--the magic which manifested whenever she sang or played her harp. No one could resist her music. But she knew that greater magic lay in the Llano, the mystic music that controlled all things. The quest for the Llano occupied Orb's life. Until she met Natasha, handsome and charming, and an even finer musician. But her mother Niobe came as an Aspect of Fire, with the news that Orb had been chosen for the role of Incarnation of Nature--The Green Mother. But she also warned of a prophecy that Orb was to marry Evil. Could she be sure that Natasha was not really Satan, the Master of Illusion, laying a trap for her...?
