If the problem persists have a mechanic diagnose your Audi automatic transmission. It may be low in transmission fluid, have worn clutches or a faulty valve body. These instructions work on various Audi models including A1 A3 A4 A5 A6 A7 Q3 Q5 Q7 TT but not all model years.

Audi Transmission ECU Adaption Reset Procedure | YOUCANIC
However, thick and dirty transmission fluid can build up on the inside of your transmission, causing multiple problems that could result in costly repairs down the road. For this reason, your Audi's transmission fluid should be changed between every 30,000 to 60,000 miles, depending on the driving conditions of the roads and areas to which your vehicle is most often subjected.

How to Replace the Transmission Fluid in an Audi A4 | It ...
If your Audi is acting as though your fluid levels you checked those and ruled them out, most likely your Audi has solenoid damage. This is easily-detected at a repair shop. If left untreated, solenoid damage will affect the fluid flow through your transmission and cause more serious (and costly) damage.
