This guide is separated into first-term and second-term general chemistry material. Each section contains 8 chapters of material that also aligns to most general chemistry textbooks for a seamless addition to study materials for students. Each chapter is designed with an introductory section of the material including common representations and where to find this material in a textbook. The second section provides worked examples of typical, multiple choice questions including how the correct answer is determined as well as how the incorrect answers were determined. Also included for each study problem is a listing of the corresponding practice questions that use that concept. The final section is a series of practice problems to test the concepts collectively. The key is provided on a separate page for all study and practice problems.

The moment is right for critical reflection on what has been assumed to be a core part of schooling. In *Ungrading*, fifteen educators write about their diverse experiences going gradeless. Some contributors are new to the practice and some have been engaging in it for decades. Some are in humanities and social sciences, some in STEM fields. Some are in higher education, but some are the K-12 pioneers who led the way. Based on rigorous and replicated research, this is the first book to show why and how faculty who wish to focus on learning, rather than sorting or judging, might proceed. It includes honest reflection on what makes ungrading challenging, and testimonials about what makes it transformative. CONTRIBUTORS: Aaron Blackwelder Susan D. Blum Arthur Chiaravalli Gary Chu Cathy N.
