From monumental tombs and domestic decoration, to acts of benefaction and portraits of ancestors, Roman freed slaves, or freedmen, were prodigious patrons of art and architecture. Traditionally, however, the history of Roman art has been told primarily through the monumental remains of the emperors and ancient writers who worked in their circles. In this study, Lauren Petersen critically investigates the notion of 'freedman art' in scholarship, dependent as it is on elite-authored texts that are filled with hyperbole and stereotypes of freedmen, such as the memorable fictional character Trimachio, a boorish ex-slave in Petronius' Satyricon. She emphasizes integrated visual ensembles within defined historical and social contexts and aims to show how material culture can reflect preoccupations that were prevalent throughout Roman society. Interdisciplinary in scope, this book explores the many ways that monuments and artistic commissions by freedmen spoke to a much more complex reality than that presented in literature.

Written in a casual, personable, and unassuming style, this handbook introduces readers to the basic methods of art history and the visual and contextual analysis of works of art, and teaches them how to use these types of analysis in writing about art. Futurism began as an artistic and social movement in early twentieth-century Italy. Until now, much of the scholarship available in English has focused only on a single individual or art form. This volume seeks to present a more complete picture of the movement by exploring the history of the movement, the events leading up to the movement, and the lasting impact it has had as well as the individuals involved in it. The History of Futurism: The Precursors, Protagonists, and Legacies addresses the history and legacy of what is generally seen as the founding avante-garde movement of the twentieth century. Geert Buelens, Harald Hendrix, and Monica Jansen have brought together scholarship from an international team of specialists to explore the Futurism movement as a multidisciplinary movement mixing aesthetics, politics, and science with a particular focus on the literature of the movement.

Each one of the 34 readings in this text is derived from rigorously collected field data, and addresses the major questions about art in small-scale societies: what does art do, what meanings does it convey, who makes it, how is it conceptualized by those who use it, and how does it change with the passage of time? Over 100 illustrations provide visual references and the text represents a wide variety of cultures, art forms (not only visual arts but performing arts as well), authorial voices, and theoretical models. For artists, sociologists, undergraduate and graduate readers.

Once again, the State of Arkansas has adopted An Arkansas History for Young People as an official textbook for middle-level and/or junior-high-school Arkansas-history classes. This fourth edition incorporates new research done after extensive consultations with middle-level and junior-high teachers from across the state, curriculum coordinators, literacy coaches, university professors, and students themselves. It includes a multitude of new features and is now full color throughout. This edition has been completely redesigned and now features a modern format and new graphics suitable for many levels of student readers.
