The manual was published subsequent to the Bergey's Manual of Determinative Bacteriology, though the latter is still published as a guide for identifying unknown bacteria. First published in 1923 by David Hendricks Bergey, it is used to classify bacteria based on their structural and functional attributes by ...

Bergey's Manual of Systematic Bacteriology and ... Bergey's Manual of Systematics of Archaea and Bacteria (BMSAB) is a reference work aimed at undergraduates, graduate students, researchers, professors and experienced professionals at all levels. About a hundred new genera and 600+ new species have been described per year for each of the last 5 years. To remain abreast of this explosion in knowledge of the microbial world, an electronic manual with frequent updates is necessary.

Bergey's Manual of Systematics of Archaea and Bacteria ... Systematic information will continue to be found in Bergey's Manual of Systematic Bacteriology, with the Determinative manual serving as a reference to aid in the identification of unknown bacteria. The arrangement of the book is strictly phenotypic, with no attempt to offer a natural higher classification.
