A bone is a rigid organ that constitutes part of the vertebrate skeleton in animals. Bones

Access Free Bone

protect the various organs of the body, produce red and white blood cells, store minerals, provide structure and support for the body, and enable mobility. Bones come in a variety of shapes and sizes and have a complex internal and external

Access Free Bone

structure.

Bone - Wikipedia

Bone, rigid body tissue consisting of cells embedded in an abundant hard intercellular material. The two principal components of this material, collagen and calcium

Access Free Bone

phosphate, distinguish bone from such other hard tissues as chitin, enamel, and shell.

Bone - definition of bone by The Free Dictionary

Bone spurs are bony projections that develop along bone edges. Bone spurs (osteophytes) often form where bones meet each other — in your joints. They can also form on the bones of your

Access Free Bone

spine. The main cause of bone spurs is the joint damage associated with osteoarthritis. Most bone spurs cause no symptoms and can go undetected for years.

Bone spurs - Symptoms and
