Nick Hall is back and taking the story to a new highlight. For me, Douglas Richards is evolving into a more advanced author. The start of the BrainWeb is quite horrific but too realistic to ignore. Combing action and technology was always a strong point of Douglas but this time the main characters are deepening as well.

This is an excellent second installment in the Nick Hall series. The only problem with this series is its improbable assumptions concerning telepathy. Once you set these absurdities aside, these are excellent stories with powerfully driven characters, a strong plot, and many twists and turns to delight the reader and keep him or her guessing.

Nick Hall wakes up in a dumpster, with no memory but the ability to read minds. Oh, and he can access the Internet just using his brain. So a great premise. The first half continued to be pretty good as Nick works out how to handle his new powers and meets a girl with whom he can communicate telepathically.
