Fertility rates vary considerably across and within societies, and over time. Over the last three decades, social demographers have made remarkable progress in documenting these axes of variation, but theoretical models to explain family change and variation have lagged behind. At the same time, our sister disciplines—from cultural anthropology to social psychology to cognitive science and beyond—have made dramatic strides in understanding how social action works, and how bodies, brains, cultural contexts, and structural conditions are coordinated in that process. Understanding Family Change and Variation: Toward a Theory of Conjunctural Action argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action, and proposes a framework through which that reintegration can occur. This framework posits that material and

schematic structures profoundly shape the occurrence, frequency, and context of the vital events that constitute the object of social demography. Fertility and family behaviors are best understood as a function not just of individual traits, but of the structured contexts in which behavior occurs. This approach upends many assumptions in social demography, encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture, of agency versus structure, or of biology versus society.

Growing up on Guam in 1972, fifteen-year-old Kiko is beset by worries: He's never kissed a girl, the popular guys get all the attention at school--but the worst part is the serious problems at home. His older brother is missing in Vietnam, his grandfather is

losing it to dementia, and he just learned that his mother was raped by a Japanese soldier during World War II. It all comes together when he discovers an old man, a Japanese soldier, hiding in the jungle behind his house. It's not the same man who raped his mother, but, in his rage, Kiko cares only about protecting his family and avenging his mom--no matter what it takes. And so, a shy, peaceable boy begins to plan a murder. But how far will Kiko go to prove to himself that he's a man? Based on a true incident in history, *No Surrender Soldier* is the story of a boy grappling with ancient questions of courage and manhood before he can move on.

Martin Werbelow married Christine Krause in about 1786 in Hanseberg, Brandenburg, Prussia. They had ten children. Traces descendants of three of their sons, Christian Friedrich, Wilhelm

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic,

piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

The role of civil society organisations in Brussels is debated. Some view them as representatives of their members and thus as legitimising agents for policy-making in the European Union. Others see them as being elitist and out of touch with their membership bases, therefore ill-suited to promote democracy at the EU level. Taking civil society organisations in the EU's external relations as an example, Meike Rodekamp submits these controversial views to a reality check. Interviews with representatives of civil society organisations in Brussels and their member organisations in the EU show that the Brussels offices have not lost contact with their members. However, member organisations differ substantially in their participation in internal decision-making processes, which raises doubts about the legitimacy gains through civil society participation in EU policy-

gradually turned into a Communist state, closing all borders, cutting the people off from the non-Communist world. Christine, 16, yearns for freedom but can she leave her family behind? She tries, in several dramatic attempts, to escape to the free west. Her life is filled with fear. She finally succeeds in reaching the free west. This story is rich in detail of the post-WW II life in the Soviet Zone, with flashbacks into the Nazi past, as experienced by a young girl. This story is based on the life of the author. Germany was reunited in November 1989 and Christine finally saw her family again.

This book seeks to answer the question 'Which institutional architecture for which kind of democracy for the EU?' by bringing

two important recent debates together- the institutional analysis of the Union and its democratic assessment. The book examines a series of institutional architectures in light of the democratic quality of the processes and decisions generated by them. The discussion of these various institutional architectures is preceded by an analysis of the democratic values and principles according to which institutional architectures and governance structures should be assessed. The first part of the volume starts from key democratic principles and indicates which institutional architectures are most likely to embody them. The second part is dedicated to those institutional architectures that best describe the current state of the European Union and its likely future development, particularly given the impact of the current economic crisis. The fundamental belief that animates this volume is that it is only by paying attention

to the democratic legitimacy of the Union that the process of European integration may hope to be sustainable, particularly in the face of the difficult economic crisis that the members of the Euro-area and the Union in general are experiencing.

This book tackles the issue of civil society's democratic input to EU governance. It looks at how participatory democracy, laid down in the Lisbon Treaty and advocated by the Commission, is put into practice and whether the involvement of civil society lives up to the high expectation of upgrading the Union's democratic legitimacy.
