Calculus Definitions > Single variable calculus deals with functions of one variable. For example, $f(x) = 2x$. has one variable x , so it would be included in this type of calculus. While x is the most common variable, you'll also come across t (for time) z (for complex numbers) and a variety of other single variables. Why

can draw one and only one line through both points. By the slope of this line we mean the ratio of Δy to Δx . The slope is often denoted m : $m = \frac{\Delta y}{\Delta x} = \frac{y_2 - y_1}{x_2 - x_1}$. For example, the line joining the points $(1; 2)$ and $(3; 5)$ has slope $\frac{5 - 2}{3 - 1} = \frac{3}{2} = 1.5$.

calculus to reveal the power and richness of the subject. Standard topics from calculus — such as the real numbers, differentiation and integration, mean value theorems, the exponential function — are reviewed and elucidated before digging into a deeper exploration of theory and applications, such as the AGM inequality, convexity, the art of integration, and explicit formulas for π . Further topics and examples are introduced through a plethora of exercises that both challenge and delight the reader. While the reader is thereby exposed to the many threads of calculus, the coherence of the subject is preserved throughout by an emphasis on patterns of development, of proof and argumentation, and of

concepts and theorems that are dealt with informally in the first two semesters of a beginning calculus course. As such, students are expected to gain a deeper understanding of the fundamental concepts of calculus, such as limits (with an emphasis on ϵ - δ definitions), continuity (including an appreciation of the difference between mere pointwise and uniform continuity), the derivative (with rigorous proofs of various versions of L'Hôpital's rule) and the Riemann integral (discussing improper integrals in-depth, including the comparison and Dirichlet tests). Success in this course is expected to prepare students for more advanced courses in real and complex analysis and this book will help to accomplish this. The first
