by changing the object's speed or direction.

- A force is a push or a pull that acts on an object. One newton is the force that causes a 1-kilogram mass to accelerate at a rate of 1 meter per second each second.

Section 12.4 – Universal Forces.

Online Library Chapter 12

Forces And Motion Section

12.4 Universal Forces

The four universal forces are the electromagnetic, strong nuclear, weak nuclear, and gravitational forces. All the universal forces act over a distance between particles of matter, which means that the particles do not need to be in contact with one another.
