The fifth volume of A History of the Book in America addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading--in

The Enduring Book demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

after the end of World War II, that it seemed as though the two countries had easily forgotten the war they had fought. Here Yoshikuni Igarashi offers a provocative look at how Japanese postwar society struggled to understand its war loss and the resulting national trauma, even as forces within the society sought to suppress these memories. Igarashi argues that Japan's nationhood survived the war's destruction in part through a popular culture that expressed memories of loss and devastation more readily than political discourse ever could. He shows how the desire to represent the past motivated Japan's cultural productions in the first twenty-five years of the postwar period. Japanese war experiences were often described through narrative devices that downplayed the war's disruptive effects on Japan's history. Rather than treat these narratives as obstacles to historical inquiry, Igarashi reads them along with counter-narratives that attempted to register the original impact of the war. He traces the tensions between remembering and forgetting by focusing on the body as the central site for Japan's production of the past. This approach leads to fascinating discussions of such diverse topics as the use of the atomic bomb, hygiene policies under the U.S. occupation, the monstrous body of Godzilla, the first Western professional wrestling matches in Japan, the transformation of Tokyo and the athletic body for the 1964 Tokyo Olympics, and the writer

Merriam Press World War II Memoir This is the story of an inductee into the Army during World War II and his ventures from basic training into and through combat and assignment to postwar duties during which he remained a PFC. It is a view of the war in Europe from the invasion of Africa through the postwar period until the occupation forces were established in Germany and the inductees brought home. It refutes or adds to some stories by high ranking civilian officials and Army officers that have been published and tells the story as seen from a very low level. It recognizes heroes and others without blatantly condemning anyone other than stating what actually happened by personal witness. The reader can draw his own conclusions regarding right or wrong. The author offers this story as part of history and to show that with the best of publicized intentions the facts may vary from those reported. With the goal of obtaining personal recognition there have been situations to be recorded and evaluated against publicized stories written for profit or personal gain. In so doing the author intends to offer entertaining reading and food for thought along with what really happened by his own views on the scenes in which he was involved. On June 6, 1944, the Allies launched Operation Overlord, the largest, most hazardous amphibious assault in history. The objective: establishment of a lodgment area in Normandy from which the Allies could strike at the heart of Germany and destroy the German armed forces. Air supremacy over northwest Europe was an absolute prerequisite for the success of the invasion, and to achieve it the

U.S. Army Air Forces launched two campaigns aimed at destroying the Germans' transportation advantages in the area. In the months and days leading up to the assault, the Army Air Forces ceaselessly bombed rail centers, rendering most of the railways in northern France and Belgium unusable. Once the actual invasion was underway, the Allies shifted to an interdiction campaign, using precise air attacks on critical transportation installations near the battlefield to neutralize Germany's efforts to resupply and reinforce their troops. This work makes use of many wartime records that had remained classified until recently.

A long-awaited English translation of the groundbreaking oral history of women in World War II across Europe and Russia—from the winner of the Nobel Prize in Literature NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • The Guardian • NPR • The Economist • Milwaukee Journal Sentinel • Kirkus Reviews For more than three decades, Svetlana Alexievich has been the memory and conscience of the twentieth century. When the Swedish Academy awarded her the Nobel Prize, it cited her invention of “a new kind of literary genre,” describing her work as “a history of emotions . . . a history of the soul.” In *The Unwomanly Face of War*, Alexievich chronicles the experiences of the Soviet women who fought on the front lines, on the home front, and in the occupied territories. These women—more than a million in total—were nurses and doctors, pilots, tank drivers,

machine-gunners, and snipers. They battled alongside men, and yet, after the victory, their efforts and sacrifices were forgotten. Alexievich traveled thousands of miles and visited more than a hundred towns to record these women's stories. Together, this symphony of voices reveals a different aspect of the war—the everyday details of life in combat left out of the official histories. Translated by the renowned Richard Pevear and Larissa Volokhonsky, *The Unwomanly Face of War* is a powerful and poignant account of the central conflict of the twentieth century, a kaleidoscopic portrait of the human side of war. THE WINNER OF THE NOBEL PRIZE IN LITERATURE “for her polyphonic writings, a monument to suffering and courage in our time.” “A landmark.”—Timothy Snyder, author of *On Tyranny: Twenty Lessons from the Twentieth Century* “An astonishing book, harrowing and life-affirming . . . It deserves the widest possible readership.”—Paula Hawkins, author of *The Girl on the Train* “Alexievich has gained probably the world's deepest, most eloquent understanding of the post-Soviet condition. . . . [She] has consistently chronicled that which has been intentionally forgotten.”—Masha Gessen, National Book Award-winning author of *The Future Is History*
