No musical genre has had a more chequered critical history than the concerto and yet simultaneously retained as consistently prominent a place in the affections of the concert-going public. This volume, one of very few to deal with the genre in its entirety, assumes a broad remit, setting the concerto in its musical and non-musical contexts, examining the concertos that have made important contributions to musical culture, and looking at performance-related topics. A picture emerges of a genre in a continual state of change, re-inventing itself in the process of growth and development and regularly challenging its performers and listeners to broaden the horizons of their musical experience.

Since the eighteenth century, violin concertos have provided a showcase for dramatic interplay between a soloist’s virtuosity and the blended sonority of an orchestra’s many instruments. Using this genre to showcase skill and ingenuity, composers cemented the violin concerto as a key genre of classical music and gifted our ears with such timeless masterpieces as Vivaldi’s Four Seasons. In Experiencing the Violin Concerto, Franco Sciannameo draws on his years of scholarship and violin performance to trace the genre through Baroque, Classical, and modern periods. Along the way, he explores the social and personal histories of composers, and the fabulous virtuosos who performed concertos, and audiences they conquered worldwide. Inviting readers to consider not only the components of the music but also the power of perception and experience, Sciannameo recreates the atmosphere of a live performance as he paints a narrative history of technique and innovation. Experiencing the Violin Concerto uses descriptions in place of technical jargon to make the world of classical music accessible to amateur music lovers. As part of the Listener’s Companion series, the volume gives readers an enhanced experience of key works by investigating the environments in which the works were written and first performed as well as those in which they are enjoyed today.

This new work lists over 1,200 classical and operatic recordings in the compact disc format in a system whereby the individual titles are graded for their appropriateness to specific types and sizes of libraries. The preface describes the care and handling of compact discs and differentiates between this medium and those recordings made in the old, analog, fashion. The introduction contains a precis on criticism but is largely devoted to evaluating numerous recording soloists, ensembles, and singers. The main portion of the volume covers over 160 composers whose works are important in constituting a nuclear library collection of ‘serious’ music.
