Teddi usually ignored Drew Scones's warnings to stay out of his cases... After all, who in her right mind would give up steamy post-arrest debriefing sessions with Detective Swoons? But when Drew's partner is accused of murdering Peaches Lipschitz--aka the Hooker Housewife--the department promptly takes Drew off the case. Now he's looking at a major lifestyle change and finally doing the one thing that really rattles Teddi... proposing marriage! So Long Island's Most Dangerous Decorator is doing the impossible: breaking up with Drew to investigate on her own...and making her snobbish mother happy for the first time ever. And she's finding that slipping Drew clues undercover is as hot--and dangerous--as revealing Peaches' secret clientele. But Drew isn't going to stay sidelined for long--or let one irresistible interior decorator get away scot-free....

Asia must be at the center of the global fight against climate change. It is the world's most populous region, with high economic growth, a rising share of global greenhouse gas emissions, and the most vulnerability to climate risks. Its current resource- and emission-intensive growth pattern is not sustainable. This study recognizes low-carbon green growth as an imperative—not an option—for developing Asia. Asia has already started to move toward low-carbon green growth. Many emerging economies have started to use sustainable development to bring competitiveness to their industries and to serve growing green technology markets. The aim of this study is to share the experiences of emerging Asian economies and the lessons learned. The book assesses the low-carbon and green policies and practices taken by Asian countries, identifies gaps, and examines new opportunities for low-carbon green growth.
