Description: Cultural resource management in contemporary ...

In the broadest sense, cultural resource management is the vocation and practice of managing cultural resources, such as the arts and heritage. It incorporates Cultural Heritage Management which is concerned with traditional and historic culture. It also delves into the material culture of archaeology. Cultural resource management encompasses current culture, including progressive and innovative culture, such as urban culture, rather than simply preserving and presenting traditional forms of cul

New Perspectives in Cultural Resource Management describes the historic developments, current challenges, and future opportunities presented by contemporary Cultural Resource Management (CRM). CRM is a substantial aspect of archaeology, history, historical architecture, historical preservation, and public policy in the US and other countries. Chapter authors are innovators and leaders in the development and contemporary practice of CRM. Collectively they have conducted thousands of investigations and managed programs at local, state, tribal, and national levels. The chapters provide perspectives on the methods, policies, and procedures of historical and contemporary CRM. Recommendations are provided on current practices likely to be effective in the coming decades.

Collection of provocative essays on how to improve cultural resource management practice by the leading consultant in the field.

'Rethinking Cultural Resource Management in Southeast Asia' explores the challenges facing efforts to protect the cultural assets of Southeast Asia from the ravages of tourism and economic development.

The entrance of Native Americans into the world of cultural resource management is forcing a change in the traditional paradigms that have guided archaeologists, anthropologists, and other CRM professionals. This book examines these developments from tribal perspectives and articulates native views on the identification of cultural resource, how they should be handled and by whom, and what their meaning is in contemporary life. Stapp and Burney also demonstrate the connections between cultural resource and other issues such as native sovereignty, economic development, human rights, and cultural integrity.

What is archaeology, and why should we do it? Tom King, arguably the best-known heritage management consultant in the United States, answers the basic question of every introductory student from the unique perspective of one who actively uses archaeology for cultural resource management. Designed as a supplement for introduction to archaeology classes, this brief and breezy book runs the reader through the major principles of archaeology, using examples from the author's own field work and that of others. King shows how contemporary archaeology, as part of the larger cultural resource management endeavor, acts to help preserve and protect prehistoric and historic sites in the United States and elsewhere. Brief biographies of other CRM archaeologists help students envision career paths they might emulate. The book ends with an exploration of some of the thorny problems facing the contemporary archaeologist to help foster class discussion. An ideal ice-breaker for introductory college classes in archaeology, one that will get students engaged in the subject and thinking about its challenges.

Stressing the interdisciplinary, public-policy oriented character of Cultural Resource Management (CRM), which is not merely "applied archaeology," this short, relatively uncomplicated introduction is aimed at emerging archaeologists. Drawing on fifty-plus years' experience, and augmented by the advice of fourteen collaborators, Cultural Resource Management explains what "CRM archaeologists" do, and explores the public policy, ethical, and pragmatic implications of doing it for a living.

Renowned cultural resource management consultant Thomas F. King demystifies this web of regulations surrounding this field, providing frank, practical advice on how to ensure regulatory compliance in dealing with archaeological sites, historic buildings, urban districts, sacred sites and objects, shipwrecks, and archives. In this new edition, King reports on changes in cultural resource laws, regulations, and executive orders in the past five years and adds material on Section 106 review, NEPA, and the 'Preserve America' executive order.
