Importance of good diesel engine filtration. Dirt is the deadly enemy of a diesel engine, and it comes in many forms. While nobody would deliberately put a handful of sand in an engine, the truth is that you could be doing something very similar every time you add or change lubricants, fill the fuel tank or just start the engine. That's why there is an oil, fuel and air filter on every engine, and why using the right filter for each is critically important.

Lubricating Oil Filters for Marine Diesel Engine. The lubrication system of an engine provides a supply of lubricating oil to the various moving parts in the engine. Its main function is to enable the formation of a film of oil between the moving parts, which reduces friction and wear. The lubricating oil is also used as a cleaner and in some engines as a coolant.
