This Companion, the first dedicated to the philosopher and historian Xenophon of Athens, gives readers a sense of why he has held such a prominent place in literary and political culture from antiquity to the present and has been a favourite author of individuals as diverse as Machiavelli, Thomas Jefferson, and Leo Tolstoy. It also sets out the major problems and issues that are at stake in the study of his writings, while simultaneously pointing the way forward to newer methodologies, issues, and questions. Although Xenophon's historical, philosophical, and technical works are usually studied in isolation because they belong to different modern genres, the emphasis here is on themes that cut across his large and varied body of writings. This volume is accessible to students and general readers, including those previously unfamiliar with Xenophon, and will also be of interest to scholars in various fields.

This study centres on the rhetoric of the Athenian empire, Thucydides' account of the Peloponnesian War and the notable discrepancies between his assessment of Athens and that found in tragedy, funeral orations and public art. Mills explores the contradiction between Athenian actions and their self-representation, arguing that Thucydides' highly critical, cynical approach to the Athenian empire does not reflect how the average Athenian saw his city's power. The popular education of the Athenians, as presented to them in funeral speeches, drama and public art told a very different story from that presented by Thucydides' history, and it was far more palatable to ordinary Athenians since it offered them a highly flattering portrayal of their city and, by extension, each individual who made up that city. Drama, Oratory and Thucydides in Fifth-Century Athens: Teaching Imperial Lessons offers a fascinating insight into Athenian self-representation and will be of interest to anyone working on classical Athens, the Greek polis and classical historiography.

Although scholars continue to address old questions about Polybius, it is clear that they are also turning their attention to aspects of his history that have been

inadequately dealt with in the past or have even gone largely unnoticed. Polybius' history is increasingly treated not just as a source of valuable information on the impressive expansion of Roman rule in the Mediterranean world, but also as a complex and nuanced narrative with its own interests and purposes. Moreover, since (apart from Livy's use of Polybius, which has been thoroughly discussed) most studies of Polybius' reception focus on the modern world, especially in relation to the theory of mixed constitutions, finding out more about Polybius' impact on ancient Greek and Roman authors remains a major desideratum. This volume brings together contributions which, in either posing new questions or reformulating old ones, attest both to the ardent scholarly interest currently directed toward Polybius and to the variety of hermeneutical issues raised by his work. Subjects discussed include Polybius' historical ideas, his methods of composition, his views on the role of the historian, his representation of cultural difference, his intertextual affinities, and his reception and influence. Taken together, the papers in this collection attempt to promote a deeper understanding of the qualities and peculiarities of Polybius' history, as well as to offer fresh insights into the interpretation of this important work.

Can a speaker's words ever be faithfully reported? This discussion of Latin literature offers an original contribution to current debates about discourse and representation. Ancient texts are discussed in conjunction with examples from modern literature to highlight what happens when speech itself becomes the subject of a story.
