A fast acting disease, the symptoms of EMS emerge within the first week of stocking a pond, and usually lead to 100% mortality before the month is out.

According to, The Fish Site, symptoms include: Erratic swimming or swimming near the bottom of the pond; Reduced growth; whitening of the hepatopancreas;

which rapidly results in mass mortalities.

The mass mortality caused by the disease has also led to a decline in global shrimp production. Production fell in 2013 to 15 per cent below 2011 levels.
