Estimating Post Harvest Food Losses Developing A
A Review of Methods for Estimating Grain Post-Harvest Losses Estimating post-harvest loss at the farm level to enhance Food Security: A Case of Nepal September 2019 International Journal of Agriculture Environment and Food Sciences 3(3):127-136 (PDF) Estimating post-harvest loss at the farm level to ...

Estimating Post Harvest Food Losses Developing A
“Improving methods for estimating post-harvest losses” is aimed at developing statistical methods for measuring post-harvest losses. Extensive research has been conducted on post-harvest losses in developing countries across different disciplines, however, a standard methodology for collecting data and estimating

A Review of Methods for Estimating Grain Post-Harvest Losses
The ICAR-IASRI has developed sampling methodologies for the different commodity groups and corresponding three guidelines for estimation of post-harvest losses of fruits and vegetables, livestock (meat and milk) and fish products, that are published as annexes to the Guidelines on the measurement of harvest and post-harvest losses in cereals and pulses.

Guidelines on the measurement of harvest and post-harvest ...
Technical paper on Post-Harvest Losses ©ACF-January 2014 Page7 Africa: In many African countries, the post-harvest losses of food cereals are estimated at 25% of the total crop harvested. For some crops such as fruits, vegetables and root crops, being less hardy than cereals, post-harvest losses can reach 50% (Voices Newsletter, 2006).

POST-HARVEST LOSSES AND STRATEGIES TO REDUCE THEM
Count the seeds in each quadrat, including any seeds in pods or heads on the ground and find the average number of seeds per quadrat, then use the following method to calculate pre-harvest loss. Pre-harvest loss (kg/ha) = [Average number of seeds per quadrat x 100] divided by [the corresponding crop type average seed number from Table 1]. Worked example for an average of five lupin seeds per quadrat in Area A: Pre-harvest loss = [5 x 100] ÷ 7 = 71kg/ha

Calculating harvesting losses | Agriculture and Food
Food loss can occur at several points along the food chain, however, harvest loss at the farm level is often overlooked which is directly impacting on sustainability. The paper attempts to estimate...
