Environmental Ethics & Human Values: Definition & Impact ...

Environmental ethics is a branch of ethics that studies the relation of human beings and the environment and how ethics play a role in this. Environmental ethics believe that humans are a part of society as well as other living creatures, which includes plants and animals. These items are a very important part of the world and are considered to be a functional part of human life.

What are Environmental Ethics? Types and Principles ...

The underlying principle of environmental ethics is that nature has intrinsic value. This means that nature and its parts are not merely means for accomplishing one's purposes but are ends in and for themselves. This sounds simple enough, but it's actually quite a radical reversal of centuries of anthropocentric thought.
