Half of the Moldovan population lives in rural areas. However, the rural employment rate is only 39 percent. Income from agricultural activities is low compared to other sectors of the economy. This evaluation seeks to contribute to organization-wide learning by drawing lessons and making recommendations that will be useful for FAO's future engagement in Moldova. FAO provided highly specialized technical expertise to formulate strategies, policies and frameworks, and offer innovative approaches and solutions. Likewise, the evaluation found evidence of results leading to livelihood improvements,

empowerment, and adoption of more sustainable practices and technologies. Nevertheless, FAO should further strive to support the transformation to more efficient, inclusive, resilient and sustainable agrifood systems for better production, better nutrition, a better environment and a better life, leaving no one behind. In doing so, FAO should use the knowledge generated to refine programmes in consultation with key partners towards effective and sustainable results.

The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP). The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction; safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test layout map and evaluation forms.

"TRB's National Cooperative Highway Research Program (NCHRP) Report 759: Effective Removal of Pavement Markings aids in the selection of safe, cost-effective, and environmentally acceptable practices for the removal of work zone and permanent pavement markings. The practices highlighted in this report emphasize minimal damage to the underlying pavement or visible character of the surface course." -- Publisher's description

Fundamentals of Mobile Heavy Equipment provides students with a thorough introduction to the diagnosis, repair, and maintenance of off-road mobile heavy equipment. With comprehensive, up-to-date coverage of the latest technology in the field, it addresses the equipment used in construction, agricultural, forestry, and mining industries.
