Using the GNU Compiler Collection

This is a reference manual for the C programming language as implemented by the GNU Compiler Collection (GCC).

Specifically, this manual aims to document: The 1989 ANSI C standard, commonly known as "C89" The 1999 ISO C standard, commonly known as "C99", to the extent that C99 is implemented by GCC

## The GNU C Reference Manual

GCC was originally written as the compiler for the GNU operating system. The GNU system was developed to be 100% free software, free in the sense that it respects the user's freedom . We strive to provide regular, high quality releases , which we want to work well on a variety of native and cross targets (including GNU/Linux), and encourage everyone to contribute changes or help testing GCC.

## Bookmark File PDF Gnu Gcc Manual

The option `-fgnu89-inline` tells GCC to use the traditional GNU semantics for "inline" functions when in C99 mode. This option is accepted and ignored by GCC versions 4.1.3 up to but not including 4.3. In GCC versions 4.3 and later it changes the behavior of GCC in C99 mode. Using this option is roughly equivalent to adding the "gnu\_inline" function attribute to all inline functions. The option ...
