In 1978, Intel introduced the x86 instruction set architecture (ISA) which was the successor of the 8088 microprocessors. It was the first microprocessor-based computing architecture developed in the IA family. After that, Intel developed other microprocessors like 80186, 80286, 80386, Core 2 and Pentium series, etc. All these were the successors of the 8086 processor.
