Is the EU Doomed? | Foreign Affairs

The European Union is the latest power to give a firm blow to the pro-China WHO. The European Commission has proposed new rules which would necessarily empower the EU to declare a health emergency. The EU is also preparing to arm itself with the powers of examining the individual plans of its members to handle Pandemics.

WHO is doomed as the whole world is realising its China ...

The European Union is in crisis. Crippled by economic problems, political brinkmanship, and institutional rigidity, the EU faces an increasingly uncertain future. In this compelling essay, leading scholar of European politics, Jan Zielonka argues that although the EU will only survive in modest form - deprived of many real powers - Europe as an integrated entity will grow stronger. Integration, he contends, will continue apace because of European states' profound economic interdependence, historic ties and the need for political pragmatism. A revitalized Europe led by major cities, regions and powerful NGOs will emerge in which a new type of continental solidarity can flourish. The EU may well be doomed, but Europe certainly is not.

Eleven articles, presented by Heinemann-Gruder (political science, Humboldt U., Germany) aim to explore the question of whether the use of federalist conceptions is appropriate in analyzing processes of integration and disintegration in Europe. The focus is on an institutionalist perspective on difficulties faced by specific forms of government and diverse national traditions when combined with federalism. Conceptual and comparative frameworks are provided, lessons from the collapse of the Eastern European federations are examined, and possible directions for European federalism are discussed. Considering the enormous problems of the Balkans during the 1990s, the experts who contributed to this study believe that there are solutions to the seemingly intractable situation and the legacy of the

disintegration of the former Soviet Union.

Central and East European Studies Series, 2 (International Studies Library, 33) Over the past decade the policies of the European Union and the Russian Federation have increasingly come into conflict, as both have attempted to pursue their interests in their respective 'neighbourhoods', neighbourhoods that overlap throughout post-Soviet territory. Russia views efforts by the EU to establish closer political and economic ties and to support democratic political developments in the region as direct challenges to Russia's 'legitimate' interests. With the reemergence of Russia as an important international actor under Vladimir Putin, Russian policy became increasingly assertive in protecting those interests, culminating in the war with Georgia. The book provides a broad examination of various aspects of this competitive relationship. Table of Contents Preface Contributors Introduction - Roger E. Kanet University of Miami, USA and Maria Raquel Freire University of Coimbra, Portugal PART I: RUSSIA, THE EUROPEAN UNION, AND THEIR COMMON NEIGHBOURHOOD Ch. 1. Russian Foreign Policy Toward Its Neighbourhood: A Complex Mosaic of Relations - Maria Raquel Freire, University of Coimbra, Portugal Ch. 2. Kanet, University of Miami, USA & Maria Raquel Freire, University of Coimbra, Portugal About the Editors Roger E. Kanet, Ph.D. (1966) in Politics, Princeton University, is Professor of International Studies at the University of Miami. He has published extensively on international politics and Russian foreign policy, including *The United States and Europe in a Changing World* (RoL, 2009) and *A Resurgent Russia and the West: The European Union, NATO and Beyond* (RoL, 2009). Maria Raquel Freire, Ph.D., University of Kent at Canterbury, is assistant professor in the Department of International Relations at the University of Coimbra and researcher at the Centre for Social Studies (CES) of the University of Coimbra. Her research focuses on foreign policy, Russia and the post-Soviet space and peace studies. She has published widely, including *Key Players and Regional Dynamics in Eurasia* (Palgrave, 2010)

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in *Global Trends 2030*, including: a review of the four previous *Global Trends* reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States' Global Role 101 Alternative Worlds 107 Stalled Engines 110 FUSION 116 Gini-out-of-the-Bottle 122 Nonstate World 128 Acknowledgements 134 GT2030 Blog References 137 Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. The euro crisis is tearing Europe apart. But the heart of the matter is that, as the crisis unfolds, the basic rules of European democracy are being subverted or turned into their opposite, bypassing parliaments, governments and EU institutions. Multilateralism is turning into unilateralism, equality into hegemony, sovereignty into the dependency and recognition into disrespect for the dignity of other nations. Even France, which long dominated European integration, must submit to Berlin's strictures now that it must fear for its international credit rating. How did this happen? The anticipation of the European catastrophe has already fundamentally changed the European landscape of power. It is giving birth to a political monster: a German Europe. Germany did not seek this leadership position - rather, it is a perfect illustration of the law of unintended consequences. The invention and implementation of the euro was the price demanded by France in order to pin Germany down to a European Monetary Union in the context of German unification. It was a quid pro quo for binding a united Germany into a more integrated Europe in which France would continue to play the leading role. But the precise opposite has happened. Economically the euro turned out to be very good for Germany, and with the euro crisis Chancellor Angela Merkel became the informal Queen of Europe. The new grammar of power reflects the difference between creditor and debtor countries; it is not a military but an economic logic. Its ideological foundation is 'German euro nationalism' - that is, an extended European version of the Deutschmark nationalism that underpinned German identity after the Second World War. In this way the German model of stability is being surreptitiously elevated into the guiding idea for Europe. The

Europe we have now will not be able to survive in the risk-laden storms of the globalized world. The EU has to be more than a grim marriage sustained by the fear of the chaos that would be caused by its breakdown. It has to be built on something more positive: a vision of rebuilding Europe bottom-up, creating a Europe of the citizen. There is no better way to reinvigorate Europe than through the coming together of ordinary Europeans acting on their own behalf.

Problems posed by Syria's chemical weapons attacks, Egypt's ouster of an elected government, and myriad other global dilemmas beg the question of whether and how the world can be governed. The challenge is addressing what former UN Secretary-General Kofi Annan called Problems without Passports environmental, economic, humanitarian, and political crises that threaten stability, prosperity, and even human survival. Everything is globalized everything "except" politics, which remain imprisoned behind national borders. The world has changed, but our basic way of managing it has not. We pursue fitful, tactical, short-term, and local responses for actual or looming threats that require sustained, strategic, longer-run, and global actions. With clarity and passion, Thomas G. Weiss argues for a diversity of organizational arrangements some centralized, some decentralized and a plurality of problem-solving strategies some worldwide, some local. He proposes a three-pronged strategy: the expansion of the formidable amount of practical global governance that already exists, the harnessing of political and economic possibilities opened by the communications revolution, and the recommitment by states to a fundamental revamping of the United Nations."

This two-volume project provides a multi-sectoral perspective over the EU's external projections from traditional as well as critical theoretical and institutional perspectives, and is supported by numerous case studies covering the whole extent of the EU's external relations. The aim is to strive to present new approaches as well as detailed background studies in analyzing the EU as a global actor. Volume 1: The first volume "Theoretical and Institutional Approaches to the EU's External Relations" addresses the EU's overall external post-Lisbon Treaty presence both globally and regionally (e.g. in its "neighborhood"), with a special emphasis on the EU's institutional framework. It also offers fresh and innovative theoretical approaches to understanding the EU's international position. - With a preface by Alvaro de Vasoncelos (former Director European Union Institute for Security Studies) Volume 2: The second volume "Policies, Actions and Influence of the EU's External Relations", examines in both quantitative and qualitative contributions the EU's international efficacy from a political, economic and social perspective based on a plethora of its engagements.

The Greek economic crisis has imperilled the stability of the eurozone, generating much global anxiety. Policymakers, analysts, and the media have daily debated the course of the Greek economy, prescribing ways to move forward. This collection of essays progressively moves from an analysis of the causes of the crisis and the policy responses so far to a debate on some of the country's advantages and capabilities that should underpin its new development model and propel the return to growth. The book analytically chooses to view the glass as half-full and seeks to provide motivation and inspiration for change by indicating some of the economic sectors where Greece maintains a comparative advantage. Therefore, it challenges the emerging picture of Greece as a country doomed to failure, where everything falls apart.

How philosophical differences between Eurozone nations led to the Euro crisis—and where to go from here Why is Europe's great monetary endeavor, the Euro, in trouble? A string of economic difficulties in Greece, Ireland, Spain, Italy, and other Eurozone nations has left observers wondering whether the currency union can survive. In this book, Markus Brunnermeier, Harold James, and Jean-Pierre Landau argue that the core problem with the Euro lies in the philosophical differences between the founding countries of the Eurozone, particularly Germany and France. But the authors also show how these seemingly incompatible differences can be reconciled to ensure Europe's survival. As the authors demonstrate, Germany, a federal state with strong regional governments, saw the Maastricht Treaty, the framework for the Euro, as a set of rules. France, on the other hand, with a more centralized system of government, saw the framework as flexible, to be overseen by governments. The authors discuss how the troubles faced by the Euro have led its member states to focus on national, as opposed to collective, responses, a reaction explained by the resurgence of the battle of economic ideas: rules vs. discretion, liability vs. solidarity, solvency vs. liquidity, austerity vs. stimulus. Weaving together economic analysis and historical reflection, *The Euro and the Battle of Ideas* provides a forensic investigation and a road map for Europe's future.
