So I m looking at a Craftsman 18.5HP with a Briggs and Stratton INTEK engine and a Troy Built with a Kohler Command 16HP engine. I m leaning towards the Kohler because I ve heard it s a better engine. I also know the Kohler has a pressurized lubrication system and oil filter. I m not so sure about the Intek, but it s 2.5HP more (lol)!!!!

I recently picked up a John Deere L120 with a 20 horsepower Briggs & Stratton Intek (V twin). When I picked it up, the mower didn't run but would crank, I put in fresh fuel, new spark plugs, new oil and a new oil filter. The mower ran after that but very rough. I determined the carburetor was dirty and cleaned it.

"In this volume I have collected all the essays on wild bees scattered through the Souvenirs entomologiques, with the exception of those on the mason-bees."--Translator's note.

We are living in an age when 'nature' seems to be on the brink of extinction yet, at the same time, 'nature' is becoming increasingly ubiquitous and unstable as a category for representation and debate. Futurenatural brings together leading theorists of culture and science to discuss the concept of 'nature' - its past, present and future. Contributors discuss the impact on our daily life of recent developments on biotechnologies, electronic media and ecological politics. Increasingly, scientific theories and models have been taken up as cultural metaphors that have material effects in transforming 'ways of seeing' and 'structures of feeling'. The book addresses the issue of whether political and cultural debates about the body and environment can take place without reference to 'nature' or the 'natural'. This collection considers how we might 'think' a future developing from emergent scientific theories and discourses. What cultural forms may be produced when new knowledges challenge and undermine traditional ways of conceiving the 'natural'.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This volume features dozens of Basho's poems as well as works by his predecessors and ten of his disciples — Kikaku, Ransetsu, Joso, and Kyoroku among them.

Learn how to program with Python from beginning to end. This book is for beginners who want to get up to speed quickly and become intermediate programmers fast!

Growing from tiny tadpoles to massive master jumpers, frogs and their life cycles are fascinating. How far can frogs jump? Why do their eggs look slimy? Answer these questions and many more in this illustrated introduction to amphibians. With her signature bright, well-labeled diagrams and simple text, Gail Gibbons introduces the habitat and life cycles of frogs and gives an overview of common frog behaviors. Important biology vocabulary is introduced, defined, and reinforced with kid-friendly language and clear illustrations--plus a page of intriguing frog trivia and clear diagrams that show how frogs are different from toads. Bonus material is included about the unique role frogs play in the environment.

\* Offers timely material, and is anticipated that over 80% of Fortune 1000 companies will incorporate mobile devices and wireless applications into their existing systems over the next two-five years. \* Authors utilize XML and related technologies such as XSL and XSLT as well as Web services for server-sided application construction. \* Details how to build a complete enterprise application using all of the technologies discussed in the book. \* Web site updates the example application built as well as additional wireless Java links and software.

This book is based on the theory that the black Muslim movement was created from the knowledge of the Masonic order. In the early decades of the 20th century, noble drew ali established a political and religious organization known today as the Moorish Science Temple of America. It was this organization that exposed black to something other than the normal Christian influences of that day. Ali a high degree freemason, incorporated various Masonic teachings from an auxiliary group. Known as the AEAONMS ancient Egyptian Arabic order of noble of the mystic shrine A pseudo Islamic/Arabic oriental organization that served as a wake up call to a lost knowledge. A knowledge that was taken away from Africans during the slave trades. The theory behind this book is that the majority of the slaves that were taken from the west coast of Africa were practicing Muslims, and these Muslims were forced to convert to Christianity under the strong oppression of slavery. At one time Afro-Americans were the biggest minority in the American society. About 90% of the todays population of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century. At the beginning of the 19th century most of the so-called Negroes lived in the plantation areas of the Southern States. After the Civil War and the abolition of slavery it wasnt until the early 1920s and 30s that blacks were beginning to experiment with other faiths. Of all the faiths Islam became the fastest growing religion and the most popular. This book by far is in no way a research into black history, instead it covers a more deeper aspect of history in which I call the history behind the history. It explores the true Asiatic origins of the ancient religions of Hinduism, Buddhism well as the Islamic faith. Finally It explores the Masonic symbolisms of alis Moorish science dogma digging deeper into the esoteric side of his Aquarian/Masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye. One would think that Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older & they possess more sources of knowledge & spiritual salvation. Yet there are those who have turned away from traditional Christian dominated environments in order to find a greater understanding of themselves and the world in which they live. One alternative has been to seek knowledge in the various religious groups that arose in the 20th century.
