The 4th Edition has been completely revised, updated, and expanded to deliver all of the current information you need with an expanded focus on the safety, quality, and outcomes data that are integral to delivering the very best patient care. What students and clinicians are saying: "This little pocket flip book is invaluable if you are a nursing student or new nurse, wealth of information very condensed and to the point." - Robert S., Amazon.com "I carried this around on my clinicals and it was great! It has nice rundowns of every major body system/problem that you might encounter on a med/surg floor." - Lisa R., Amazon.com "Very nice little reference book. Very helpful. Absolutely recommended. It's really good the type of paper that you can write on it and also easy to clean. Can be taken to the clinical site with no problems." - Leonardo Ruiz, Amazon.com "Perfect for a new nurse who needs a quick, concise refresher on information. Fits in my pocket nicely, and has come in handy more than once!" - Chandra N. Berger, Amazon.com "A must have for any nurse or nursing student! Everything you could need in one place!" - Jecca Leigh, Amazon.com

The 4th Edition of this popular, easy-to-use guide delivers the practical, clinically oriented content you need to deliver safe and effective health care in hospital and home settings. Thoroughly revised and updated, you'll have access to even more of the commonly-used by rarely memorized clinical information that nurses and students need.

Put the information you need at your fingertips with this handy, easy-to-use guide to the proper exercises for your patients. Each joint tab follows a consistent order—general exercises for the specific region, followed by common pathologies and surgeries, with specific interventions for each pathology or surgery. Crystal-clear photographs show you a wealth of different techniques, while a streamlined format makes the information extremely easy to understand.

This rapid reference is sure to become your #1 pediatric resource It presents all of the information needed to deliver safe, effective care for children based on their age, size, developmental level, and unique pathologies.
