The main aim of Object Oriented Design (OOD) is to improve the quality and productivity of system analysis and design by making it more usable. In analysis phase, OO models are used to fill the gap between problem and solution. It performs well in situation where systems are undergoing continuous design, adaption, and maintenance.

The Scope of Software Engineering
The Object-Oriented Paradigm Before 1975, most software organizations used no specific techniques; each individual worked his or her own way. Major breakthroughs were made between approximately 1975 and 1985, with the development of the so-called structured or classical paradigm.
