TiVo Hacks helps you get the most out of your TiVo personal video recorder. Armed with just a screwdriver and basic understanding of PC hardware (or willingness to learn), preeminent hackability awaits. This book includes hacks for changing the order of recorded programs, activating the 30-second skip to blaze through commercials, upgrading TiVo's hard drive for more hours of recording, use of TiVo's Home Media Option to remotely schedule a recording via the Web, log in to the serial port for command-line access to programming data, log files, closed-captioning data, display graphics on the TiVo screen, and even play MP3s. Readers who use advanced hacks to put TiVo on their home network via the serial port, Ethernet, USB, or wireless (with 802.11b WiFi) will watch a whole new world open up. By installing various open source software packages, you can use TiVo for mail, instant messaging, caller-ID, and more. It's also easy to run a web server on TiVo to schedule recordings, access lists of recorded shows, and even display them on a web site. While TiVo gives viewers personalized control of their TVs, TiVo Hacks gives users personalized control of TiVo. Note: Not all TiVos are the same. The original TiVo, the Series 1, is the most hackable TiVo out there; it's a box thrown together with commodity parts and the TiVo code is running on open hardware. The Series 2 TiVo, the most commonly sold TiVo today, is not open. You won't see hacks in this book that involve modifying Series 2 software.

Contents: Radiation Theory, Artificial Sources, Natural Sources, Atmospheric Scattering, Atmospheric Absorption, Propagation Through Atmospheric Turbulence, Optical Materials, Optical Design, Optical Elements-Lenses and Mirrors, Optical-Mechanical Scanning Techniques and Devices, Detectors, Charge-Coupled Devices, Imaging tubes, Photographic Film, Cooling Systems, Detector-Associated Electronics, Reticle and Image Analyses, Displays, Imaging Systems, Radiometry, Warning Systems, Tracking Systems, Ranging, Communications, and Simulation Systems, Aerodynamic Influences on Infrared System Design, and Physical Constants and Conversion Factors.
