history. The new Fourth Edition of this classic is brought fully up to date to reflect the current economic, political, and cultural climate in China. Informed by Hsü's lifetime study of the country and observations during recent visits, new chapters offer an inside view of the problems created by China's accelerated economic growth in the past decade, and examine the cultural impact of Teng Xiao-p'ing's acceptance of various Western market mechanisms to help modernize the economy. Since Mao Zedong's death in 1976, China's leaders have launched an ambitious modernization program aimed at making their nation a relatively prosperous socialist state by the year 2000. Along with the first edition's examination of the smashing of the Gang of Four, the evolution of a new order under Deng Xiaoping, the manner and costs of modernization, the normalization of relations with the United States, and the prospects for reunification with Taiwan, the second edition offers an

insider's view into China's policies of accelerated economic development and opening to the outside world, adopted at a December 1978 party conference. Focusing on the cultural impact of these policies, Hsü candidly reveals both the improved standard of living and the serious fundamental problems--including high inflation, widespread corruption, crises in leadership, loss of faith in communism, and especially the recent student protests--resulting from these recent developments.
