Compiling twenty articles on the nature of life and on the objective of the natural sciences, this remarkable book complements Robert Rosen's groundbreaking *Life Itself* -- a work that influenced a wide range of philosophers, biologists, linguists, and social scientists. In *Essays on*

Life Itself, Rosen takes to task the central objective of the natural sciences, calling into question the attempt to create objectivity in a subjective world and forcing us to reconsider where science can lead us in the years to come.

Shakespeare and Immigration critically examines the vital role of immigrants and aliens in Shakespeare's drama and culture. On the one hand, the essays in this collection interrogate how the massive influx of immigrants during the reign of Queen Elizabeth I influenced perceptions of

English identity and gave rise to anxieties about homeland security in early modern England. On the other, they shed light on how our current concerns surrounding immigration shape our perception of the role of the alien in Shakespeare's work and expand the texts in new and relevant directions for a contemporary audience. The essays consider the immigrant experience; strangers and strangeness; values of hospitality in relationship to the foreigner; the idea of a host society; religious refuge and refugees; legal views of inclusion and

exclusion; structures of xenophobia; and early modern homeland security. In doing so, this volume offers a variety of perspectives on the immigrant experience in Shakespearean drama and how the influential nature of the foreigner affects perceptions of community and identity; and, collection questions what is at stake in staging the anxieties and opportunities associated with foreigners. Ultimately, Shakespeare and Immigration offers the first sustained study of the significance of the immigrant and alien experience to our understanding of Shakespeare's work. By

presenting a compilation of views that address Shakespeare's attention to the role of the foreigner, the volume constitutes a timely and relevant addition to studies of race, ethics, and identity in Shakespeare.

Following the collapse of the Soviet Union in the early 1990s, Cuba found itself solely responsible for feeding a nation that had grown dependent on imports and trade subsidies. With fuel, fertilizers, and pesticides disappearing overnight, citizens began growing their own organic produce anywhere they could find space— on rooftops,

balconies, vacant lots, and even school playgrounds. By 1998 there were more than 8,000 urban farms in Havana producing nearly half of the country's vegetables. What began as a grassroots initiative had, in less than a decade, grown into the largest sustainable agriculture initiative ever undertaken, making Cuba the world leader in urban farming. Featuring a wealth of rarely seen material and intimate portraits of the environment, *Farming Cuba* details the innovative design strategies and explores the social, political, and environmental factors that helped shape

this pioneering urban farming program.

In *Waves of Decolonization*, David Luis-Brown reveals how between the 1880s and the 1930s, writer-activists in Cuba, Mexico, and the United States developed narratives and theories of decolonization, of full freedom and equality in the shadow of empire. They did so decades before the decolonization of Africa and Asia in the mid-twentieth century. Analyzing the work of nationalist leaders, novelists, and social scientists, including W. E. B. Du Bois, José Martí, Claude McKay, Luis-Brown

brings together an array of thinkers who linked local struggles against racial oppression and imperialism to similar struggles in other nations. With discourses and practices of hemispheric citizenship, writers in the Americas broadened conventional conceptions of rights to redress their loss under the expanding United States empire. In focusing on the transnational production of the national in the wake of U.S. imperialism, Luis-Brown emphasizes the need for expanding the linguistic and national boundaries of U.S. American culture and history. Luis-Brown traces

unfolding narratives of decolonization across a broad range of texts. He explores how Martí and Du Bois, known as the founders of Cuban and black nationalisms, came to develop anticolonial discourses that cut across racial and national divides. He illuminates how cross-fertilizations among the Harlem Renaissance, Mexican indigenismo, and Cuban negrismo in the 1920s contributed to broader efforts to keep pace with transformations unleashed by ongoing conflicts over imperialism, and he considers how those transformations were

explored in novels by McKay of Jamaica, Jesús Masdeu of Cuba, and Miguel Ángel Menéndez of Mexico. Focusing on ethnography's uneven contributions to decolonization, he investigates how Manuel Gamio, a Mexican anthropologist, and Zora Neale Hurston each adapted metropolitan social science for use by writers from the racialized periphery.
