The Origin of Humankind is Richard Leakey's personal view of the development of Homo Sapiens. At the heart of his new picture of evolution is the introduction of a heretical notion: once the first apes walked upright, the evolution of modern humans became possible and perhaps inevitable. From this one evolutionary step comes all the other evolutionary refinements and distinctions that set the human race apart from the apes.

The research also located a possible origin of modern human migration in southwestern Africa, near the coastal border of Namibia and Angola. The fossil evidence was insufficient for archaeologist Richard Leakey to resolve the debate about exactly where in Africa modern humans first appeared.

*Human evolution - Wikipedia*

If you want to meet Richard Leakey, you must read his short little summative book, The Origin of Humankind (Perseus Books 1984). In this manuscript, he explains in plain English so all of us non-doctoral candidates can understand what he has concluded after a lifetime of research it is that differentiates you and I from other animals.
