Different ways to manage TS  
Behavioural therapies provide tools for helping a person learn ways to change certain behaviours. Cognitive therapies can also help a person to change the way they think about tics in addition to taking certain action. Medication can be used to help reduce the frequency and/or intensity of tics for a period of time.

### **How To Say Tourette's Syndrome**

Tourette syndrome is a type of neurological disorder characterised by involuntary tics and repetitive vocalisations. The cause is unknown, but theories include genetic factors, bacterial infection and neurochemical abnormalities. Treatment can include medication, relaxation techniques and psychotherapy.

### **Tourette syndrome - Better Health Channel**

The main symptoms of Tourette syndrome are motor tics (sudden, uncontrollable movements such as eye blinking, grimacing, head jerking,
