This book is a history of firearms across the world from the 1100s up to the 1700s, from the time of their invention in China to the time when European firearms had become clearly superior. It asks why it was the Europeans who perfected firearms when it was the Chinese who had invented them, but it answers this question by looking at how firearms were used throughout the world.

A monumental, groundbreaking work, now in paperback, that shows how technological and strategic revolutions have transformed the battlefield Combining gripping narrative history with wide-ranging analysis, War Made New focuses on four "revolutions" in military affairs and describes how inventions ranging from gunpowder to GPS-guided air strikes have remade the field of battle and shaped the rise and fall of empires. War Made New begins with the Gunpowder Revolution and explains warfare's evolution from ritualistic, drawn-out engagements to much deadlier events, precipitating the rise of the modern nation-state. He next explores the triumph of steel and steam during the Industrial Revolution, showing how it powered the spread of European colonial empires. Moving into the twentieth century and the Second Industrial Revolution, Boot examines three critical clashes of World War II to illustrate how new technology such as the tank, radio, and airplane ushered in terrifying new forms of warfare and the rise of centralized, and even totalitarian, world powers. Finally, Boot focuses on the Gulf War, the invasion of Afghanistan, and the Iraq War, arguing that even as cutting-edge technologies have made America the greatest military power in world history, advanced communications systems have allowed decentralized, "irregular" forces to become an increasingly significant threat.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 65. Chapters: English Civil War weapons, Crossbow, English longbow, Rapier, Pike, Halberd, Arquebus, Backsword, Flintlock, Ship of the line, Musket, Club, Galleon, Basket-hilted sword, Pistol sword, Matchlock, Stiletto, Snaphance, Culverin, Small sword, Bill, Snaplock, Wall gun, Ribaudequin, Saker, Queen Elizabeth's Pocket Pistol, Linstock, Falconet, Roaring Meg, Minion, Spontoon, Demi-cannon, Basilisk, Demi-culverin, Partisan, Doglock. Excerpt: The English longbow, also called the Welsh longbow, is a powerful type of medieval longbow (a tall bow for archery) about 6 ft (1.83 m) long used by the English and Welsh for hunting and as a weapon in medieval warfare. English use of longbows was effective against the French during the Hundred Years' War, particularly at the start of the war in the battles of Crecy (1346) and Poitiers (1356), and most famously at the Battle of Agincourt (1415). They were less successful after this, with longbowmen taking casualties at the Battle of Verneuil (1424), and being completely routed at the Battle of Patay (1429) when charged before they had set up their defensive position. The term "English" or "Welsh" longbow is a modern invention to distinguish these bows from other longbows, though in fact identical bows were used across northern and western Europe, indeed a very large proportion of yew bowstaves were imported from Spain from the fourteenth century onward, if not earlier. The earliest longbow known from England, found at Ashcott Heath, Somerset, is dated to 2665 BC, but there are no surviving longbows dated to the period when the longbow was dominant (c. 1250-1450 AD). This is probably because it was in the nature of bows to become weaker, break and be replaced, rather than be handed down through generations. There are however more than 130 surviving bows from the Renaissance period. More...

The Art of Renaissance Warfare tells the story of the knight during the fifteenth and sixteenth centuries from the great victories of Edward III and the Black Prince to the fall of Richard III on Bosworth Field.During this period, new technology on the battlefield posed deadly challenges for the mounted warrior; but they also stimulated change, and the knight moved with the times. Having survived the longbow devastation at Crcy, Poitiers and Agincourt, he emerged triumphant, his armor lighter and more effective, and his military skills indispensable.This was the great age of the orders of chivalry and the freemasonry of arms that bound together comrades and adversaries in a tight international military caste. Men such as Bertrand du Guesclin and Sir John Chandos loom large in the pages of this book bold leaders and brave warriors, imbued with these traditions of chivalry and knighthood. How their heroic endeavors and the knightly code of conduct could be reconciled with the indiscriminate carnage of the 'chevauche' and the depredations of the 'free companies' is one of the principal themes of this informative and entertaining book.
